LED Lighting Bar

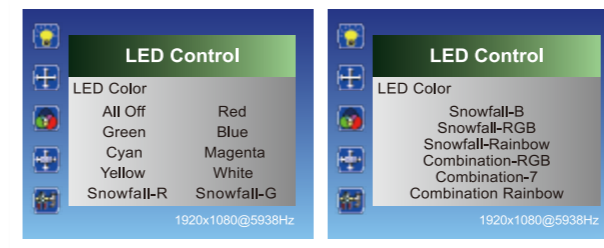

Gaming / Specialty (LED Lighting II)

- LED Color is independently lighting by order
- Customized LED Strip (Developed for reliability)
- Power stabilizer (Developed for reliability)
- Supporting the customized design

Controlled by OSD

- Built the LED Controller into the OSD Menu
- Easily control the LED lighting on the OSD by various options

Topper

LED Lighting Bar

A Type

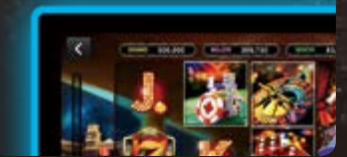

LED Lighting Bar

B Type

LED Lighting Bar

Gaming / Specialty (Curved)

43"

- FHD (2500R) / C Type available
- UHD (1500R / 1800R) / C and J Type available
- With Touch (Projected Capacitive Touch)
- Supporting the customized design

49"

- UHD (1500R / 1800R) / C and J Type Available
- With Touch (Projected Capacitive Touch)
- Supporting the customized design

* C Type

* J Type

Industrial

- Various application like Vending Machine, KIOSK, Industrial Equipment, etc.
- With Glass
- With Touch (Projected Capacitive, etc.)
- Customized Design

- Enhanced Brightness for outdoor applications
- With Glass & Touch
- AG (Anti-Glare), AR (Anti-Reflection), AF (Anti-Finger) available
- Supporting the required thickness for Cover Glass
- Customized Design
- Optical Bonding (Improved the Readability, Surface Temperature etc.)
- The easy structure for repair

AntiGlare (AG) processing could eliminate screen surface mirror problem through converting direct light to diffuse light on the touch screen.

AR processing means adding a type of coating that could reduce reflected light on the cover glass, which decreases screen reflection and increases visual effects significantly in the sun.

Military

(Display for the Control Room in the Navy Vessel)

- Any Required Size
- Customized Design
- With Touch
- Remote Control for Brightness
- Remote IR Sensor
- IP55 for Front
- Dust Filter Applied

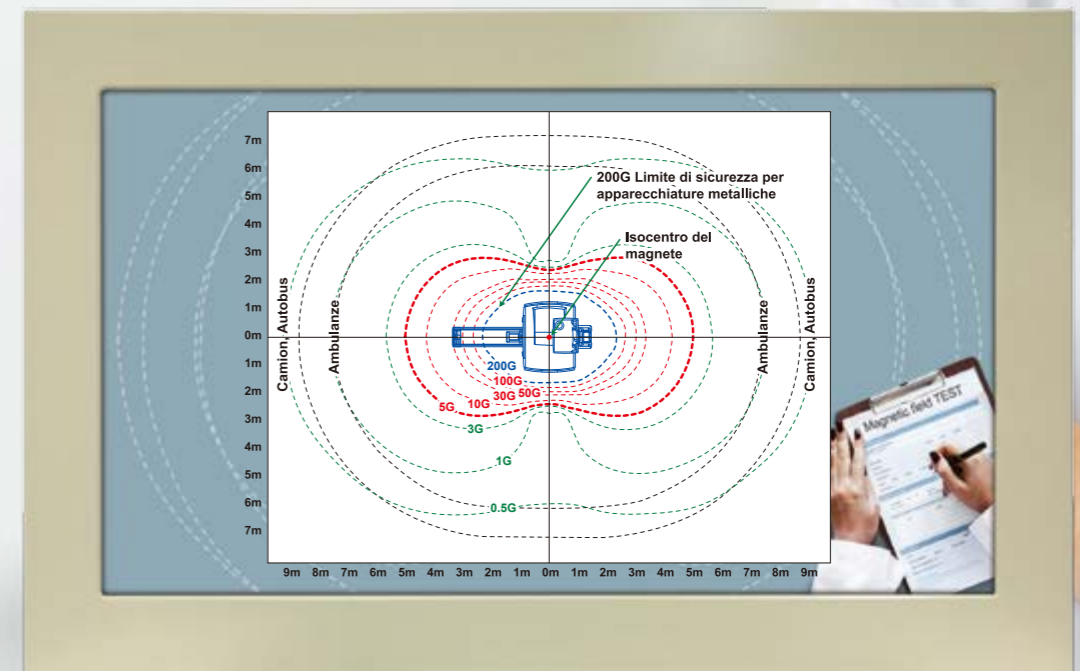

Medical

(Display for MRI Room in Hospital)

- CE IEC 60601-2-33
- Proof by 12Gauss
- Any Required Size
- With Safety Glass
- Customized Design
